POWER IN PEOPLE • PRIDE IN PAINTING

PAINTING & COATINGS FOR HEALTHCARE & MEDICAL FACILITIES

Safe. Durable. Clean.

With over 25 years of experience, RoePaint.com continues to deliver professional painting and concrete coating solutions for those industries that demand precision and quality.

Interior & Exterior Painting

- Low VOC
- Microbicial
- Scuff resistant
- Easy to clean

Concrete Floor Coatings

- Antimicrobial options
- Long lasting durability
- Add traction and increase safety
- Easy to clean

Walkways & Safety Markings

Protect concrete from salt damage and confidently keep walkways clear. Safety yellow applications for increased visibility in critical areas.

Helipad Coatings

Textured, durable coatings that withstand constant sun, rain, and snow and provide traction underfoot where it's non-negotiable.

Stay on budget with Facility Maintenance Contracts

Skip the scramble of finding new subcontractors every time a project arises.

Facility maintenance contracts keep facilities clean, operational, and compliant year after year.

PAINT SHIELD®

Microbicial Paint

The power to kill bacteria on painted surfaces.

Paint Shield is the first EPA-registered paint that kills greater than 99.9% of Staph, MRSA, *E. coli*, VRE and *Enterobacter aerogenes* within two hours of exposure on a painted surface.

Unlike traditional antimicrobial paints that only inhibit growth, Paint Shield kills pathogens on contact.

KILLS 99.9% OF BACTERIA

Add an extra layer of protection to your facility.

FAST-ACTING

Works within 2 hours of exposure.

LONG-LASTING PROTECTION

Effective for up to 4 years when surface integrity is maintained.

AESTHETIC FLEXIBILITY

Available in 550 colors, eggshell finish

PUT IT TO WORK FOR YOU.

URGENT CARES

Antimicrobial vs. Microbicial

Some paints contain antimicrobial agents that help stop the growth of mold, mildew, and bacteria, but Paint Shield® is the first EPA-registered paint that actually kills harmful bacteria on painted surfaces.

DURABLE PAINTING SOLUTIONS FOR HIGH-TRAFFIC SPACES

ResistX™ Interior Acrylic Latex

An interior acrylic latex paint built to resist stains, scrubbing, and moisture in spaces that need durable, long-lasting performance.

Why Choose It:

- Excellent washability and stain resistance
- Holds up under repeated scrubbing and sanitization
- Provides added protection in moisture-prone areas

Best For:

- Patient rooms
- Bathrooms and locker rooms
- Multipurpose spaces
- Common areas with frequent cleaning

Low VOC with excellent durability, making it a dependable choice for healthcare facilities.

Scuff Tuff™ Waterbased Enamel

A high-performance waterbased enamel designed to resist scuffing, marks, and visible wear in busy environments.

Why Choose It:

- Resists scuffs and marks better than standard paints.
- Withstands repeated cleaning with disinfectants
- Keeps walls, trim, and door looking professional longer

Best For:

- Corridors and hallways
- Doors, trim, and baseboards
- Lobbies and waiting areas
- Nurses' stations and high-contact surfaces

Low VOC and available in multiple finishes, making it safe and versatile for active healthcare settings.

Fewer repaints start with the right paint.

RAIN REFRESH™

Exterior Acrylic Latex

Keep exterior surfaces looking better for longer.

Rain Refresh™ is a premium exterior acrylic latex paint that uses self-cleaning technology to wash away dirt whenever it rains — helping buildings look fresh with less upkeep.

Self-Cleaning

Rain naturally removes dirt and debris from the surface, reducing the need for frequent exterior washing.

Proven Protection

Durability that lasts with excellent UV and weather protection to prevent blistering and peeling.

Fast Application

Self-priming with excellent application qualities that means less effort to achieve superb results.

Flexible Design

Available in a wide range of colors with a smooth, lasting finish.

HOW DOES IT WORK?

Rain Refresh™ uses advanced hydrophobic technology in its acrylic resin. This causes dirt to loosen and release from the paint film, so when rainwater hits the surface, it sheets off evenly and carries the dirt away instead of letting it stick.

RESILIENT EXTERIORS. LESS MAINTENANCE.

Reduce, or even eliminate, the need for frequent power washing, making facility maintenance easier and more cost-efficient.

Maintaining a healthcare facility takes constant time and resources. Choosing coatings like Rain Refresh™ that work harder for you means fewer maintenance cycles, less disruptions to patients and staff, and more time to focus on what matters most.
